April 2004

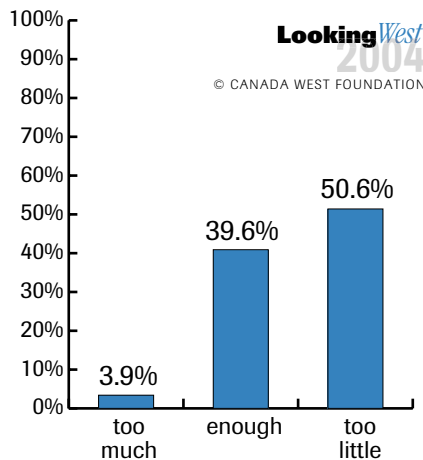

## Urban Finance

Looking West 2004 survey respondents were asked three questions about municipal government finance. In the survey, municipal government was described as “your local city, town or rural district government.”

First, respondents were asked, “Do you feel that your local government has enough, too much, or too little revenue to fulfill its current responsibilities?” This question was replicated from the Looking West 2003 survey. The majority of British Columbians feels that their local government has too little revenue, while less than 5% feel their local government has too much revenue. It is interesting to note the rising numbers of British Columbians who feel their local government’s revenues are insufficient. In 2003, this was the position of only 44% of respondents; by 2004, this had increased by almost seven percentage points – a considerable jump. Rural British Columbians are the most likely (56.8%) to state that their local government has too little revenue. In Vancouver, a plurality (45.4%) holds this position, while in Victoria, the plurality (44.9%) feels that the local government has enough revenue.

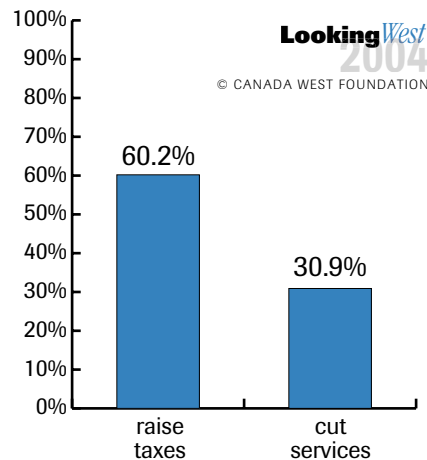

Looking West respondents were also asked, “Municipal governments typically provide services like police, fire, water treatment, transit, recreation, and building and maintaining roads and other local infrastructure. If your local government were faced with the choice of either increasing its revenues by raising taxes or decreasing expenditures by cutting services, which would you prefer? Raise local taxes in order to increase revenues; cut local services in order to reduce expenditures.” British Columbians prefer the idea of higher local taxes over the idea of reduced local services by a factor of two-to-one. Respondents from the greater Victoria area were particularly likely to favour raising taxes (72.5%) over reducing expenditures.

Local Government Revenue to Fulfill Responsibilities -  
BC Respondents

Do you feel that your local government has enough, too much, or too little revenue to fulfill its current responsibilities?

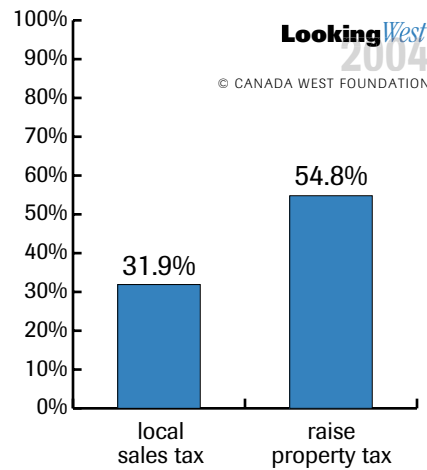

Figure 2:  
Raise Local Taxes Versus Cut Local Services -  
BC Respondents

Municipal governments typically provide services like police, fire, water treatment, transit, recreation, and building and maintaining roads and other local infrastructure. If your local government were faced with the choice of either increasing its revenues by raising taxes or decreasing expenditures by cutting services, which would you prefer? Raise local taxes in order to increase revenues; cut local services in order to reduce expenditures.

The last urban finance question looked at tax increases. Respondents were asked, "Imagine that your local government must increase its tax revenues. Which of the following two options would you prefer? Significantly decrease local property tax levels and introduce a local sales tax; significantly increase local property tax levels and do not introduce a local sales tax." The majority of British Columbians prefers the idea of raising local property tax levels, while only one third favor significantly decreasing local property tax levels and introducing a local sales tax. Respondents from the greater Victoria area were particularly likely to favor increasing local property taxes (62.9%) over a new local sales tax.

Figure 3:  
Raise Local Property Tax Versus Introduce Local Sales Tax - BC Respondents

Imagine that your local government must increase its tax revenues. Which of the following two options would you prefer? Significantly decrease local property tax levels and introduce a local sales tax; significantly increase local property tax levels and do not introduce a local sales tax.
